	Tchomia	2	0	2	2	2	6
TOTAL	²	2607	94	2701	1719	1813	293

!/ \ The data presented in this table are subject to change later, after extensive investigations and after redistribution of cases and deaths in their health areas.

As a reminder, **the recommendations of the Ministry of Health** are as follows:

1. Follow basic hygiene practices, including regular hand washing with soap and water or ashes;
2. If an acquaintance from an epidemic area comes to visit you and is ill, do not touch her and call the North Kivu civil protection hotline directly;
3. If you are identified as an Ebola patient contact, agree to be vaccinated and followed for 21 days;
4. If a person dies because of Ebola, follow the rules for safe and dignified burials. It is simply a funeral method that respects funerary customs and traditions while protecting the family and community from Ebola contamination.

anorexia, bleeding).

If all citizens respect the sanitary measures recommended by the Ministry of Health, it is possible to ensure that this case of Ebola detected in Goma is only a sporadic case that does not cause a new outbreak.

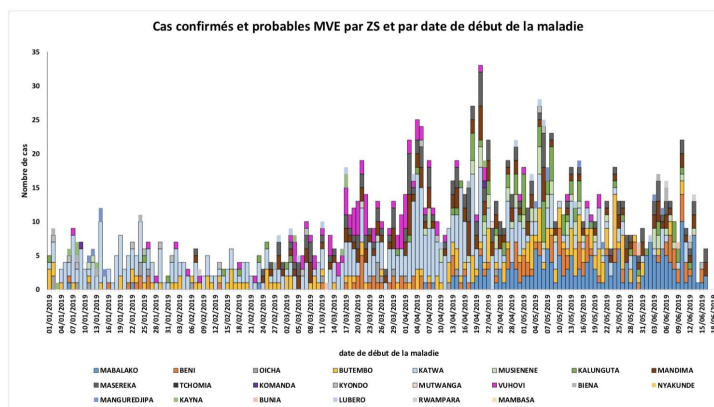

Remarks:

- *In order to prevent the total number of cases from going up or down daily, the suspect cases have been placed in a separate category. For example, suspect cases with positive laboratory tests will be added to the confirmed category, while negative ones (non-cases) will be removed from the table.*
- *Deaths occurring at the level of the CTEs are provisionally recorded in the health zones of CTE implantation pending reclassification in the health zone of case notification.*
- *The **probable case** category includes all deaths for which it was not possible to obtain biological samples for laboratory confirmation but where the investigations revealed an epidemiological link with a confirmed or probable case.*
- *A **community death** is any death occurring outside of an Ebola Treatment Center.*

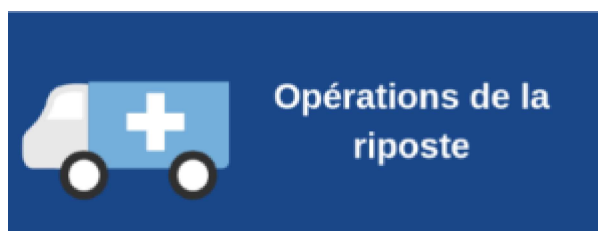

Distribution of Ebola Virus Disease (EVD) Cases by Health Zone in the Provinces of Ituri and North Kivu as of 21 July 2019

- The Technical Secretariat of the Multi-sectoral Epidemic Response Committee of the EVD is organizing a coordination workshop from 31 July to 02 August 2019 to coordinate the response to the EVD epidemic at the Karibu Hotel in Goma in the province of North Kivu.
- This workshop aims to brief the Technical Secretariat of the Multisectoral Committee by coordinating the response on the organization of the current response in order to enable it to make informed decisions thus avoiding a major disruption of the response.
- Il permettra au Secrétariat Technique de s'enquérir de la situation épidémiologique actuelle de la MVE et les principaux défis à relever, de prendre connaissance de la structure actuelle de réponse (organisation des différents niveaux de la coordination) et du nouveau plan stratégique de la riposte (PSR4) et de la synergie avec les secteurs sécuritaire, humanitaire, financier, ainsi que la préparation opérationnelle des pays limitrophes de la RDC en vue de créer un environnement favorable à la riposte.
- Il lui permettra également d'échanger sur les défis et les perspectives en rapport avec les thématiques (piliers) prioritaires. Cet atelier aboutira aux actions prioritaires à mener au cours de 90 prochains Jours et aux orientations globales sur la riposte, ainsi qu'à la nouvelle structure organisationnelle de la riposte.
- It should be noted that under SRP-4, effective and coherent change in strategies, effective coordination, consistent standards and support for the most vulnerable communities are envisaged. at risk in the provinces of North Kivu and Ituri while preventing the spread of the epidemic in other provinces and countries bordering the DRC.

Death of the second confirmed case of Ebola in Goma

- The second confirmed Ebola case from Goma died on Wednesday 31 July 2019 at the CTE Nyiragongo de Goma located in the General Reference Hospital of this city.
- Ce dernier cas de Goma est un malade, qui a commencé à présenter les symptômes de la MVE le 22 juillet 2019. C'est le 30 juillet 2019 qu'il s'est rendu à l'Hôpital général de Référence (HGR) de Goma situé dans la zone de santé de Nyiragongo, où il a été directement transféré au CTE pour des soins appropriés. Le CTE, étant installé au sein de ce HGR.
- Auparavant, il était soigné en ambulatoire par un infirmier dans un centre de santé privé communautaire dans la zone de santé de Nyiragongo.
